MOHD HAMZA SUHAIL

WHAT I AM

Hard-working developer with a knack for structuring, developing, and implementing interactive applications with all stages of development cycle for dynamic Web and Mobile platforms projects.

WHAT I DO

On the front-end, I use a combination of HTML, CSS, and JavaScript to build everything a user sees and interacts with on a website. On the back-end I develop the application, server, and database that make up the foundational structure of a website. My skills are centered around solution stacks which contain all the technologies required to set up a complete dynamic website and mobile applications.

WHAT I HAVE DEVELOPED

Developed an autoportal, a customised CRM, society management web app, home services web app, ecommerce web app, grocery delivery application, note taking application, and various responsive websites.

EXPERIENCE

AapkaPainter – Full Stack Developer

AUGUST 12, 2019 – PRESENT

- Development and maintenance of custom CRM
- Scalable and extensible content based website creation driven by SEO
- Machine Learning and big data based system
